How to Power Your iPad

Your Zoom Rooms Console come pre-installed with a Redpark Gigabit + PoE Adapter. This adapter is a PoE (802.3af) Class 0 device.

Use only the following type of device to provide power to this adapter:

- Active PoE switches compliant to the 802.3af or 802.3at (PoE+) standard
- Active or passive injectors delivering 48 volts

Do not use with passive 24 volt injectors.

How to Provide Ethernet to Your iPad

Your pre-installed with a Redpark Gigabit + PoE Adapter can provide up to 225 Mbps to your iPad. The adapter is MFi-Certified by Apple. When you iPad is connected to your Ethernet network, the **Ethernet** settings panel will appear within your iOS **Settings** app.

Extending Your Network Cable

Your Zoom Rooms Console come pre-installed with a high-quality, 6-foot, Cat7 Ethernet Cable. If your network port is more than six feet from your Zoom Rooms Console you can extended the cable using a Cat7 Coupler, such as **this one**:

<http://a.co/6tAxbjo>

Alternately, you may replace the provided cable with a longer Cat5, Cat6, or Cat7 cable.

Warranty

The pre-installed with a Redpark Gigabit + PoE Adapter has a one year warranty. Please direct support and warranty questions to <http://redpark.com/support/>.
