

MANUAL BOTTLE LABEL APPLICATOR

Quickly and Accurately Apply Labels to Bottles and Other Cylindrical Objects With the Turn of a Handle!

If you are looking for a simple and versatile solution for applying labels to bottles, cans, jars or other cylindrical objects but you don't want to spend a fortune, look no further! The BOTTLEMATE-712M is the Applicator you need!

A quick turn of the handle is all that is required to accurately and consistently place labels in the same location on all of your cylindrical containers.

The BOTTLEMATE-712M can easily label cylindrical containers with diameters ranging from 0.3" (7.5-mm) to 8" (203-mm) (size of a pen up to gallon sized containers).

Once a rhythm is established, you can label containers at speeds of up to 1,000 pieces per hour!
